To remove the StartupCheckLibrary.dll error, first
download Autoruns:

https://live.sysinternals.com/Autoruns.exe

- Run Autoruns.exe as administrator.
- In the Filterbox up top Enter: **startupcheck**
- You should see a Task Scheduler
  entry: **\Microsoft\Windows\Application
  Experience\StartupCheckLibrary**
- Right click on this entry and **Delete**.

...and that's the end of the error.

BTW Ignore any advice that recommends restoring
this dll from quarantine. It's a **CoinMiner** and you
really don't want it!
